ICE agents arrest five illegally working at Cessna plant

WICHITA, Kan. — Special agents from the U.S. Immigration and Customs Enforcement (ICE) office here yesterday arrested five illegal aliens from Mexico at the local Cessna plant on immigration violations.

ICE received the initial lead from Cessna management regarding a possible discrepancy in the documents the aliens used to gain employment at the aircraft manufacturing plant. ICE conducted a computer records check and determined that the documents were fraudulent, and that the aliens were illegally living and working in the United States. Cessna is fully cooperating in the investigation.

Federal law requires all newly hired employees to complete Form I-9 and present identity documents as proof of authorization to work in the United States.

All five aliens are currently in ICE custody, and are being held on immigration violations. ICE may be presenting these people to the U.S. Attorney's Office for possible criminal prosecution.

"Cessna management followed proper procedures," said Pete Baird, assistant special agent-in-charge of the ICE Office of Investigations in Kansas City, Mo. "It is illegal for employers to knowingly hire or continue to employ illegal aliens. Employers can also be subject to criminal prosecution."

These arrests represent how ICE is significantly enhancing its worksite enforcement efforts as part of its interior enforcement strategy. They are part of the Secure Border Initiative (SBI), a comprehensive multi-year plan by the Department of Homeland Security to secure America's borders and reduce illegal migration. Under SBI, Homeland Security seeks to gain operational control of both the northern and southern borders, while re-engineering the detention and removal system to ensure that illegal aliens are removed from the country quickly and efficiently. SBI also involves strong interior enforcement efforts, including enhanced worksite enforcement investigations and intensified efforts to track down and remove illegal aliens inside this country.

ICE

U.S. Immigration and Customs Enforcement was established in March 2003 as the largest investigative arm of the Department of Homeland Security. ICE is comprised of four integrated divisions that form a 21st century law enforcement agency with broad responsibilities for a number of key homeland security priorities.
